

The BlackBerry Enterprise Solution Service Specific Terms and Conditions

The BlackBerry Enterprise Solution from Sure provides access to the Internet and email via a bespoke handheld device, known as a BlackBerry®. It is a secure and reliable solution that delivers mobile email and Internet access using a BlackBerry Wireless Handheld™, the BlackBerry Enterprise Server and the Sure GPRS network, hence allowing users to access and manage their email inbox when away from a computer.

The BlackBerry Solutions can be supplied to You through Us in two versions. These are:

BlackBerry Enterprise Solution; this service requires the purchase of a BlackBerry Wireless Handheld and an annual contract with a monthly subscription charge per device at the rate published in Our Price List (the '**BlackBerry Enterprise Solution**'). The BlackBerry Enterprise Solution is designed to support multiple users accessing the corporate email servers. Hence, this solution additionally requires the purchase and installation of bespoke software, known as the BlackBerry Enterprise Server, which sits behind the company's firewall next to the email server within Your local area network. We will sell You the BlackBerry Enterprise Server, but are not responsible for the installation or maintenance of the BlackBerry Enterprise Server and You will be responsible for choosing a third party systems integrator to provide the installation and maintenance of the BlackBerry Enterprise Server.

BlackBerry Internet Solution and BlackBerry Enterprise Solution; in some instances a corporate who has purchased the BlackBerry Enterprise Solution may also wish to allow its employees to access both their corporate and personal email accounts through the BlackBerry Enterprise Solution and BlackBerry Internet Solution respectively. In order to do this, the corporate must request that the service be added to specific mobiles via a signed letter, printed on headed paper. There may also be a charge associated with this service.

We will not be responsible for the installation of the software that constitutes the BlackBerry Enterprise Server required within the company's local area network to enable the BlackBerry Enterprise Solution. The installation and maintenance of that software will be provided by the customer's own choice of systems integrator. We have agreed to work with a number of local systems integrators to ensure Your service needs are met in a timely and appropriate manner. We will provide You with a list of approved systems integrators, for whom We have provided access to the appropriate training materials. We strongly recommend that You contract with one of Our recommended systems integrators for the installation and maintenance of the BlackBerry Enterprise Server.

The BlackBerry Solution includes unlimited data while in the Channel Islands and the Isle of Man. In addition You can use the BlackBerry Wireless Handheld to make Calls or send SMS at rates published in Our Price List at sure.com.

As an optional facility, You may choose to provision the BlackBerry Solution on a second SIM card. In this case, the second SIM card will have voice and SMS facilities, but will have no inclusive minutes, SMS or any other form of inclusive service. The second SIM card will not be subject to standard monthly rental charge, however the BlackBerry Solution monthly rental charge will apply.
